VF2459G/AU20

2 NEEDLE FLAT BED INTERLOCK STITCH MACHINE FOR LIP BINDING, WITH RIGHT HAND FABRIC TRIMMER, METERING DEVICE AND TAPE CUTTER

Applicable for Lip Binding using narrow elastic tapes

This model sews and inserts double prefolded narrow elastic tapes in one operation to leg openings of panties etc

Best solution for "seam burst" on turning curves

- The right hand fabric trimmer is positioned just in front of the folder to cut the end of fabric.
- The fabric is precisely sewn into a folded elastic tape when turning curves.

Equipped with Stepping Motor Driven Metering device (vertical type)

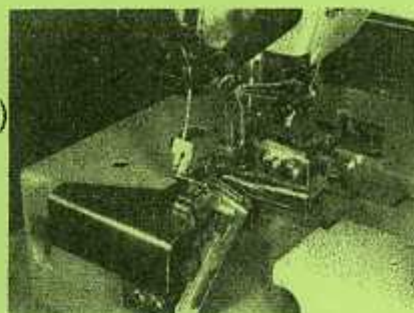

- It enables 20 different feeding amounts of elastic tape for 26 different kinds of operation.

Tape width: 12-20mm

- Various folders are available to meet different tapes in width.

AU20 : Air-operated automatic tape cutter at start and end of seam

- For sub material saving with photo-cell controlled automatic cutting.

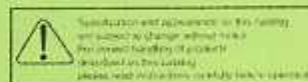

Recommended devices

- AEF-32 : compact type clamp system automatic tape feeder enables to feed elastic tapes into the metering device without load.
- TL1 · TL2 : compact spot light is helpful for operators to minimize their fatigue by brightening a sewing spot.
